Professional Summary

Information Technology student with 2+ months of professional experience as a SOC Analyst – L1 Intern, alongside hands-on SOC experience in security monitoring, SIEM operations, log analysis, and incident investigation gained through independent cybersecurity lab projects. Practical exposure to Splunk Enterprise, Splunk Universal Forwarder, Sysmon, Windows Event Logs, and SPL through detection query and dashboard development and real-world incident investigation (malware/ZIP delivery, process execution analysis). Strong in incident response documentation, cross-functional communication, and analytical troubleshooting. Seeking SOC Analyst L1, Cybersecurity Analyst, or Blue Team opportunities.

Technical Skills

Cybersecurity:	SIEM (Splunk Enterprise), SPL, Sysmon, Windows Event Logs, Threat Detection, Log Analysis, Incident Investigation, Threat Intelligence, IOC Analysis, MITRE ATT&CK
Networking:	TCP/IP, DNS, HTTP/HTTPS, SSH
Programming/Scripting:	Python, Bash, PowerShell, JavaScript, SQL
Operating Systems:	Windows, Linux (Ubuntu Server), Kali Linux
Tools:	Splunk Universal Forwarder, Git, GitHub, Visual Studio Code, VirtualBox
Core Competencies:	Incident Response Documentation, Cross-functional Communication, Analytical Troubleshooting

Education

Dr. D. Y. Patil University Pune, Ambi
Bachelor of Technology in Information Technology
Pune, Maharashtra

Aug. 2023 – May 2027
CGPA: 8.54/10

Experience

Cybug Solutions Pvt. Ltd. <i>SOC Analyst – L1 Intern</i>	<i>Aug. 10, 2026 – Present</i> Pune, Maharashtra
- Performed SOC monitoring and security log analysis using Splunk SIEM, Windows Event Logs, Sysmon, and Splunk Universal Forwarder across Windows and Linux endpoints. - Investigated a reported malware-related incident involving a suspicious ZIP file delivery and subsequent WhatsApp Web activity; imported and analyzed <code>.evtx</code> evidence in Splunk. - Developed and tested SPL queries, detection rules, dashboards, and alerts for failed logins, brute-force activity, authentication events, and suspicious process execution (Event ID 4688). - Investigated Windows Security Event IDs 4624, 4625, 4740 and Sysmon Event ID 1 to identify suspicious activity; documented investigation methodology, evidence, findings, and recommendations. - Contributed to a client-facing security monitoring POC covering endpoint/server monitoring requirements, Sysmon deployment, and Cloudflare-related log considerations.	

Technical Projects

SOC Monitoring & Threat Detection Lab [GitHub]	<i>Splunk Enterprise, Sysmon, Windows Event Logs, SPL, PowerShell</i>
- Deployed a distributed architecture with a centralized Splunk Enterprise SIEM instance collecting telemetry from multiple Windows endpoints via Splunk Universal Forwarder. - Designed SPL detection queries, dashboards, and alerts for failed logins, account lockouts, and suspicious process activity, tuned to reduce false-positive noise. - Applied MITRE ATT&CK fundamentals while documenting detection logic, monitoring architecture, and investigation workflows.	
Linux Server Provisioning & Automation Lab [GitHub]	<i>Ubuntu Server, Bash, Python, systemd, VirtualBox</i>
- Automated Ubuntu Server provisioning using Bash scripts within a local VirtualBox environment. - Built a Python-based health monitoring service managed via systemd services and timers, with validation scripts for service health and configuration. - Documented deployment, security hardening, and troubleshooting procedures for a reproducible server setup.	

Cybersecurity Training & Badges

- SOC Analyst Learning Path** – LetsDefend (*In Progress*)
- Cybersecurity for Students Path** – LetsDefend (*In Progress*)
- Introduction to Cybersecurity** – Cisco Networking Academy (Aug. 2025)
- Cybersecurity** – Skill India Digital Hub (Aug. 2025)

Extracurricular Activities

- Training & Placement Office (TPO) Coordinator**, Dr. D. Y. Patil University, Ambi (Mar. 2025 – Present) – Coordinated placement drives and recruiter/student communication.
